Price List

StoreFront 6 Advanced Edition (AE) - \$1,166

StoreFront 6 Advanced Edition (AE) from Previous Version - \$611

- **Order Fulfillment** - Merchants can manage incoming orders with StoreFront's order fulfillment tools. They can track which orders have been paid and/or shipped, print packing slips, and enter shipment tracking numbers.
- **Weight Sensitive Attributes** - Shipping costs get under control with accurate rates based on the actual weight of a product. That means a vendor who sells coffee in 12 oz, 3 lb, and 5 lb sizes can specify the weight difference for each size option, making his real-time shipping rates more precise.
- **Customer Defined Attributes** - Provide shoppers with a field to input product specific special instructions or information. This is a powerful feature for merchants who offer personalized merchandise!
- **eCoupons** - Now its easy to use coupons as sales incentives. Specify when and how the coupon will expire and what items the coupon can be applied to.
- **Customer Specific Pricing** - Allows merchants to set up multiple tiered pricing specific to classes of customers, allowing "frequent shopper" programs or multi-level distribution systems.
- **HTML E-Mails** - Now, merchants can send html e-mails to customers - and add graphics and dynamic data for real impact.

- **Search Engine Submission** – Type in your own site-specific key words, meta-tags and descriptions, and StoreFront will automatically place them on your web store pages.
- **Related Items** – How about that "suggestive selling!" Now, retailers can display related items on product detail pages for more chances to upsell.
- **Marketplaces** – Automatically market products on popular auctions sites like eBay, Yahoo!Auctions, Ubid, etc. and shopping portals like Dealtime.
- **Gift Wrap with Messages** – Shoppers can have items gift wrapped and include a personalized message with multiple gifts - all within one transaction.
- **Multiple Shipping Addresses** – Just like it sounds. A customer can do holiday shopping and send gifts to multiple people within in a single order.
- **Customer Address Book** – Shoppers can store an unlimited number of addresses in a personal address book. We make it easy for shoppers every step of the way.
- **Gift Certificates** – StoreFront 6.0 lets web stores to accept gift certificates as payment. Any leftover amount can be saved for later.
- **Integrated Shipment Tracking** - Bring customers back to the web store to track delivery status. Get the same information returned from the shipping carrier's own web site while promoting repeat purchases.
- **Running Cart Total** - Lets customers keep track of their order with a cart summary on every page.
- **e-Check Processing** – Shoppers can enter key information (e.g., bank number, account number, check number and amount of check) and the amount will be deducted from their bank account and credited to the merchant real-time. This gives merchants - and their customers - major flexibility.
- **3rd Tax Tier** – Local tax region options can be added to the basic state/province and country tax.
- **Quick Search** - Let shoppers search for items from any page. A great feature!
- **Automated Drop Shipping** - Merchants can identify unique vendors with each product, so that when an order comes in, the product can ship right to the customer without the middle-stop at the merchant's

location - zero hassle for the merchant. And faster service for the shopper!

- **Online Order Tracking** – Buyer can see the status of the goods online. For knowing the exact position of the product just by entering Airway Bill no., Shipping Bill no. etc.
